

Car Care Clinic Program

Arizona is considered a Severe Weather Area—Very Hot, Dry and Dusty

- **Radiator and Heater Hoses**
 - Check and/or replace every 3 to 4 years
 - Damaged by Dry heat and chemical electrolysis
- **Engine Belts**
 - Check and/or replace every 3 years
 - Look for cracking
- **Lube, Oil and Oil Filter**
 - Change every 3,000 to 5,000 miles or 6—12 months
 - Fuel and metal contaminates
 - Standard oils
 - Synthetic oils
- **Transmission service**
 - Every 30,000 miles
 - Includes Drain and Fill, filter and flush
 - Look for burned smell and discolored fluid
- **Radiator and Cooling System Service**
 - Every 30,000 miles
 - Dirty and Contaminated
 - Helps prolong and prevent pump and steering failures
- **Brake Fluid Service**
 - Every 30,000 miles
 - Contaminates such as moisture
- **Air Conditioning Service**
 - Every 2 years or when not blowing cold
 - Adding refrigerant versus evacuating
 - How, why and where refrigerant leaks
- **Battery**
 - Check and service annually
 - Corroded cables can cause failures
- **Wheel alignment**
 - Check every year
- **Tune up**
 - Sparkplugs
 - See manufacturers' mileage recommendations
 - Vehicles come with different types and life span
 - Fuel systems
 - Serviced every 30,000 miles
 - Fuel filters, air filters and PCV valves should be checked annually
- **Tires**
 - Check every year for wear and tread issues
 - Check air pressure monthly
